

Momentum Associates: Sustainability Policy

Statement of policy

Momentum Associates aims to promote sustainability in three main areas:

- Environment - Ensuring that we use finite resources carefully and manage waste so as to minimize the negative and maximize the positive impact of our activities.
- Economy - Ensuring that the business is financially viable, engages in good employment practice and is of benefit to the economy as a whole.
- Community - Ensuring that business is overall of benefit to communities, their culture & heritage and does not endanger them.

The director(s) of Momentum Associates are responsible for the effective operation of this policy. A copy of this policy is available from our office, at 36, Shelford Road, Radcliffe On Trent, Nottingham, NG12 1AF.

Sustainability Policy

ENERGY

We will reduce our negative impact on the local and global environment through prudent use of energy, using energy-efficient equipment and renewable sources wherever this is practicable.

WASTE

We adhere to the basic principle of "reduce, reuse, recycle" and attempt to apply it to everything we buy, use or dispose of.

TRANSPORT

When making any decision about transport, we attempt to use the practicable option with the lowest impact on the environment in the following order; walk, cycle, public transport, shared car, car, boat, plane. We will only fly where there is no practicable alternative.

PURCHASING

We favour local suppliers, manufacturers and service providers, coops and businesses with green credentials when they meet appropriate quality criteria.

PARTICIPATION & SOCIAL INCLUSION

Momentum Associates are committed to the development of public and voluntary sector organisations including Social Enterprises and independent organisations. We work with the principle of social inclusion for a healthy, creative community, where each individual is valued and encouraged to fulfil their potential.
